FRICION INTERSTITIELLE URBAINE

VECTEUR DE POSSIBILITÉS PAR LA RÉCONCILIATION DE POLARITÉS

"If there is to be a "new urbanism" [...] it will no longer be concerned with the arrangement of more or less objects but with the irrigation to territories with potential; it will no longer aim for stable configurations but for the creation of enabling fields that accommodate processes that refuse to be crystallized into definitive forms; it will no longer be about meticulous definition, the imposition of limits, but about expanding notions, denying boundaries, not about separating and identifying entities, but about discovering unnameable hybrids; it will no longer be obsessed with the city but with the manipulation of infrastructures for endless intensifications and diversifications, shortcuts and redistributions - the reinvention of psychological space. Since the urban is now pervasive, urbanism will never be again about the "new", only about the "more" and the "modified".»
